

## To the resident,

At Adelaide Zoo, we are always looking for edible plant material for a variety of animals. From towering giraffes to little Quokkas, with more than 2,500 hungry mouths to feed, we're always looking for plant material for animal enrichment and to supplement animal diets.

**We are looking for public donations of certain healthy plants (which have not been sprayed with any chemicals) and have identified a plant or tree on your property that may be of use to our animals.**

Our horticulture team cut browse from the public or businesses which have trees that are suitable for nesting or supplementary dietary needs, and require pruning, seasonal trimming or removal. The trimming and removal of branches for this purposes is provided free of charge but unfortunately we do not have the resources to do large tree removals. We will however, prune trees, leave the site in a tidy manner and stack cut logs.

If you are happy for us to come and trim your plants, harvest your bamboo or to remove and transplant entire bamboo clumps to our plantation, **please contact our Horticulture Team Via [azbrowse@zoossa.com.au](mailto:azbrowse@zoossa.com.au), Adelaide Zoo switch board on 8267 3255, or [adelaidezoo.com.au/adelaide-zoo-gardens](http://adelaidezoo.com.au/adelaide-zoo-gardens)**

Ideally each visit should provide us with a large ute-load of material. It's also preferable for our staff to cut the browse material themselves to ensure it is the correct species and at its freshest upon delivery.

**For more information please visit [adelaidezoo.com.au/adelaide-zoo-gardens](http://adelaidezoo.com.au/adelaide-zoo-gardens)**

**Thank you from our animals!**
